National Budget Commentary

At a glance

The Honorable Minister for Economy, Attorney General, Minister for Civil Services and Communications Mr. Aiyaz Sayed-Khaiyum delivered tonight (17 July 2020) the 2020/2021 ('F21') National Budget address. The F21 budget follows on from the COVID-19 response budget of March 2020 in response to the devastating effects of the virus on the Fiji economy.

The key focus of the F21 budget is to provide taxation relief in particular to businesses and at the same time continue the significant Government spending impact on the economy despite drastically reduced taxation revenues.

Taxation reform

Significant taxation reform includes:

- Support for tourism dependent businesses in the form of the abolishment of Service Turnover Tax of 6% on all prescribed services and a reduction in the Environmental and Climate Adaption levy ("ECAL") from 10% to 5%. Similarly, the threshold for businesses that are required to charge ECAL has increased to those with revenue over F\$3m pa (from \$1.25m);
- Departure tax is also reduced to \$100 per passenger (from \$200) with cash incentives for the first 150,000 visitors to return to Fiji for holiday. Excise tax on alcohol has also been reduced by 50%, improving the tourism product offering in this regard;
- There are major structural taxation changes such as the abolishment of stamp duty altogether, which will reduce transaction costs and insurance costs for business;
- Custom duties and import exercise have also been restructured with major reductions in duties affecting some 1,600 plus import categories; and
- There are other major taxation reforms such as new investment packages for medical investment, subdivision of lots, private sector investment in buildings and residential housing development.

Government of Fiji Fiscal position

The costs to the Government of Fiji by the pandemic have been dramatic with Government revenue forecast to decline to \$1.7 billion in F21 from \$2.76 billion in F20 and \$3.1 billion in F19.

Government expenditures have and will remain constant between \$3.6 billion in F19 to \$3.7 billion in F21.

The fiscal deficit for F21 is set at 20.2% of GDP or \$2 billion. There is also an obligation for principal payments of \$750 million taking the gross deficit to \$2.75 billion. The fiscal deficit in F20 was \$0.8 billion.

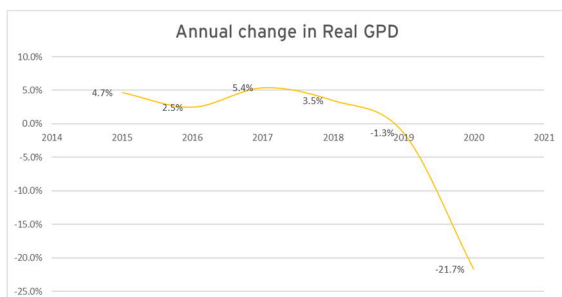

Debt levels are expected to increase as a result to \$8.3 billion or 83.4% of GDP by the end of July 2021.

2020-21 National Budget Commentary

The Fiji Economy

The COVID-19 pandemic has severely disrupted the global economy with devastating impacts on financial markets, jobs and businesses. The International Monetary Fund (IMF) has projected a global contraction of 4.9 percent for 2020, making this the worst economic crisis since the Great Depression in the 1930s.

The Fijian economy is estimated to have contracted by 1.3 percent in 2019 amid the global slowdown, weak domestic demand and low business confidence, ending nine consecutive years of economic growth since 2010.

In 2020, the Fijian economy is projected to contract by 21.7 percent given the devastating impact of the COVID-19 pandemic on the tourism sector and its rippling effects on all other sectors of the economy. This is the largest economic contraction in Fiji's history.

Tourism related activities contribute around 35 percent to GDP and visitor arrivals are forecast to decline by 75 percent in F20. As a result, accommodation & food service activities, wholesale & retail trade, transport & storage, administration & support services and arts & entertainment are expected to contract severely.

Year-end annual inflation in 2019 was -0.9 percent, mainly due to lower prices in alcoholic beverages, tobacco & narcotics, communications, housing, water, electricity, gas & other fuels and transport.

Year-end inflation for 2020 is expected at 1 percent, reflecting the impact of the pandemic on domestic and external demand, as well as global commodity prices such as crude oil.

Total exports grew by 2.7 percent in 2019 to \$2,167.8 million, led by higher re-exports which more than offset the decline in domestic exports. The contraction in domestic exports was driven by declines in pine woodchips, cement, gold, cartons and garments, which negated growth in exports of mineral water, sugar, fish, mahogany, molasses, taro and chemicals.

In 2019, total imports fell by 8.6 percent to \$5,075.8 million, due to declines in the import of machinery and transport equipment, manufactured goods, chemicals, mineral fuel, miscellaneous goods, food & live animals, crude materials and animal & vegetable oil & fats. This reflects lower aggregate demand, the slowdown in economic activity and tightening financial conditions earlier in the year.

2020-21

National Budget Commentary

Fiji recorded a current account deficit of \$572.5 million in 2019, equivalent to 4.9 percent of GDP, an improvement from a 7.3 percent deficit in 2018.

Tourism earnings grew by 2.7 percent to \$2,065.5 million in 2019. With significantly lower expected visitor arrivals in 2020, earnings are projected to fall by about 70 percent. However, for 2021 and 2022, tourism earnings are expected to rebound by 66.6 percent and 6 percent, respectively.

Personal remittances stood at \$587.5 million in 2019 and are forecast to decrease by 15 percent to \$499.5 million in 2020. In 2021 and 2022, remittances are projected to grow by 14.1 percent and 10 percent, respectively, in line with the anticipated global growth.

Monetary policy

The Reserve Bank of Fiji (RBF) will continue to focus on ensuring adequate level of foreign reserves and low and stable inflation. Foreign reserves (RBF holdings) levels in early July 2020 were around \$2.15 billion, equivalent to almost 7 months of retained imports.

Sources: Revised Budget estimates are from COVID-19 Response Supplementary Budget delivered in March 20 Economic and fiscal update supplement to the 2020-2021 budget address

Key highlights of the Government fiscal position are:

- ▶ Government receipts in F21 will be down 38% compared to the prior year (F20) and down 47% from F19;
- ▶ Government expenditure in F21 will increase by 4% compared to the prior year (F20) and stands at \$3.7 billion;
- ▶ The deficit increases by \$1,164 million to \$2,000 million as a result;
- ▶ GDP is expected to contract by -3% in F21 with largest decline being in F20 of -21.7%;
- ▶ Government debt to GDP will be 83.4% as the deficit will be funded by borrowing;
- ▶ The Increase in debt levels will be primarily sourced internationally from the World Bank, ADB and other international borrowers with the FPNF funding 32%.

2020-21 National Budget Commentary

Government Revenue

Government revenue, of which tax revenue comprises 90%, have nearly halved due to the pandemic. Tax revenues are expected to further decline in F21 due to the reduction in a number of taxes to stimulate economic activity support tourism and increase domestic demand.

Government revenue as a percentage of GDP will as a result drop dramatically from 27% in F19 to 16% in F21. Significant concessions have been made on future tourism tax revenue as well on customs duties to encourage economic activity.

Expenditure

The largest component of Government's operating expenditure is personnel costs. In FY2018-2019, personnel costs amounted to \$1,017 million or around 41.9% of total operating expenditure, and around 28.2% of total expenditure.

There will be no reduction in pay for all other civil servants. Government, as the largest employer in the economy (around 38,000 civil servants), is mindful that any significant reduction in public sector wages and salaries will place considerable strain on domestic activity and the welfare of thousands of families.

Interest in F21 is forecast at \$403m (F20 \$350m) which equates to 11% of total expenditure or forecast at 4% of GDP.

Government debt

Government debt as at July 2020 is forecast to reach \$6.7 billion or 65.6% of GDP due to an increased borrowing limit in the 2019-2020 COVID-19 Response Budget to accommodate a higher deficit of 8.2%. The significant increase in debt to GDP is also attributed to the downward revision of nominal GDP given the massive economic contraction projected for this financial year.
