

FIJI INSTITUTE OF ACCOUNTANTS SEMINAR

Ethics

The IFAC International Code of Ethics recognises that the objectives of the Accounting profession are to work to the highest standards of professionalism, to attain the highest level of performance and generally to meet the public interest. The Senior Partner of an international accounting organisation will speak on ethics related to the profession and highlight the importance in today's world.

From another profession's perspective

Similarly the medical profession operates with their code of ethics. A General Practitioner will discuss the basic principles of medical ethics and draw similarities between the two professions.
