

FIJI INSTITUTE OF ACCOUNTANTS SEMINAR

RPA – The Future of Finance Automation

The current evolution of automation technology is transforming the face of the finance function. In response to this business leaders are recognising the unique opportunities and challenges a digital transformation of their business can deliver. The growth of digital labour will affect organisations for many years to come. Some may struggle with disparate and un-coordinated automation initiatives as well as fragmented underlying IT systems and applications. There will be continued uncertainty over where to best start, when to, and how to invest in automation and a Digital Workforce whilst managing the myriad of change management considerations. The Digital Workforce is here - are you embracing the opportunity within your organisation?

Fiji Personal Properties Securities Act 2017 & Registry

The presentation will cover the Personal Property Securities Act 2017 and the recently launched Fiji Personal Property Securities Registry. The session will provide the audience with background information on the secured transactions reform as well as an overview of the 2017 legislation. A demonstration of the online registry will also introduce the new process of filing legal notices of security interests in personal property pledged as collateral for credit.

This seminar will be of benefit to accountants and the general business community who wish to be updated on the subject matters.
